6+ Years Experience

CORE TESTING

Selenium + Java, Rest Assured,
SDET, Cucumber / BDD,
Automation Testing, API Testing,
UAT

AI / ML TESTING

Mistral, Gemma, LLM / GenAI,
Prompt Testing, Model Testing,
Model Regression, Model
Evaluation, Response Validation

TESTING TYPES

Functional, Regression, Integration,
Black Box, White Box, Web App,
Mobile, Production Validation

SEARCH & NLP

NLP / NER, Autocomplete, Spell
Correction, Search Relevance,
Query Suggestions, Denylist, Intent
Detection, Multilingual

TOOLS & DEVOPS

Postman, Jira, Git / GitHub, Jenkins,
Kibana, Elasticsearch, New Relic,
Splunk, AWS, Linux, EMR Cluster,
Locust, QPS / RPS

PRACTICES

Agile / Scrum, Log Analysis,
Debugging, PR Review, Env.
Validation, Dashboard & Alert
Creation

LANGUAGES

English, Hindi

Utsav Singh

SDET | QA AUTOMATION ENGINEER | AI/ML & GENAI TESTING

PROFESSIONAL SUMMARY

SDET with 6+ years of QA experience at Adobe Systems and Clickon Technologies, specializing in test automation (Selenium + Java, Rest Assured), API validation, AI/ML and GenAI testing, search and query understanding, performance testing, and production assurance. Hands-on experience creating AI model test environments and validating deployments for Mistral, Gemma, and other model workloads, including regression, prompt, text-query, and QPS testing.

WORK EXPERIENCE

Software Engineer II – SDET / QA Automation

Aug 2022 – Present

Adobe Systems

- Design and maintain end-to-end automation suites using Selenium WebDriver + Java and Rest Assured.
- Perform API testing with Postman; validate service contracts and integration touchpoints across microservices.
- Create and validate AI model test environments and support model deployments for Mistral, Gemma, and other AI workloads.
- Execute AI/ML and GenAI testing: functional, prompt and response validation, edge cases, model/version regression, and text-query scenarios.
- Validate AI service responses for schema, required fields, status codes, formatting, expected behavior, and error handling.
- Run QPS and performance tests with baseline runs followed by 5-10 RPS and 10-15 RPS text-query workloads; analyze average and P95/P99 latency, throughput, and error rate.
- Use Splunk, New Relic, Kibana, and Elasticsearch for production monitoring, log analysis, request-level debugging, and incident investigation.

Software Test Engineer – QA

Aug 2020 – Jul 2022

Clickon Technologies Pvt. Ltd.

- Performed functional, regression, integration, smoke, and sanity testing for web applications and backend services.
- Prepared and executed test cases, scenarios, and test plans based on business requirements.
- Identified, tracked, and reported bugs in Jira; coordinated with developers on resolution and re-verification.
- Validated APIs and backend responses for workflows, edge cases, and boundary conditions.

PROJECTS

AI/ML Model Validation & QPS Testing

Adobe Systems

Mistral, Gemma, Prompt Validation, Model Regression, Text Query Testing, QPS Benchmarking

- Built model test environments and supported deployment validation for Mistral, Gemma, and other AI model workloads.
- Executed functional, regression, prompt, edge-case, and response validation for AI-powered text-query services.
- Compared latency, throughput, and error behavior across baseline, 5-10 RPS, and 10-15 RPS workloads.
- Validated API response contracts, required fields, status codes, and failure handling across environments.
- Investigated performance and production issues using request IDs, Splunk, New Relic, Elasticsearch, and Kibana.

Intelligent Search & Query Understanding Platform

Adobe Systems

Search Relevance, NLP / NER, Intent Detection, API Validation

- Validated autocomplete, spell correction, query suggestions, search relevance, NLP/NER, and intent detection end-to-end.
- Verified offensive-query and denylist handling, metadata filtering, and multilingual edge cases.
- Performed functional and regression testing of search APIs and backend services using Postman and Rest Assured.
- Analyzed search logs and query responses in Elasticsearch and Kibana; coordinated with ML/NLP teams on quality improvements.
- Created and validated dashboards monitoring search performance, latency, and processor-level metrics.

EDUCATION

B.Tech / B.E. – Bachelor of Technology & Engineering

2020

Dr. APJ Abdul Kalam Technical University, Lucknow

Diploma – Computer Science / Engineering

2013 – 2016

Board of Technical Education, Uttar Pradesh
